

# Piramide matematikoak

Oinarrizko kalkuluko manipulazio jarduera (batuketa eta kenketa), kantitate-grafia eta gaitasun bisoespazialak.

## Nola jokatzten da?

-10 ontzi behar ditugu (plastikozkoak edo kartoizkoak), ahal dela hondo leuneko edalontziak, 0tik 9ra bitarteko zenbakiak idatzi ahal izateko.

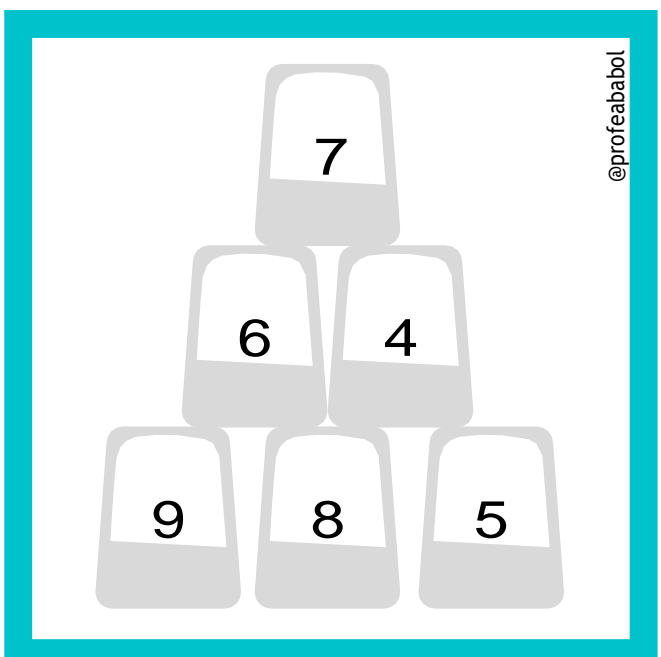

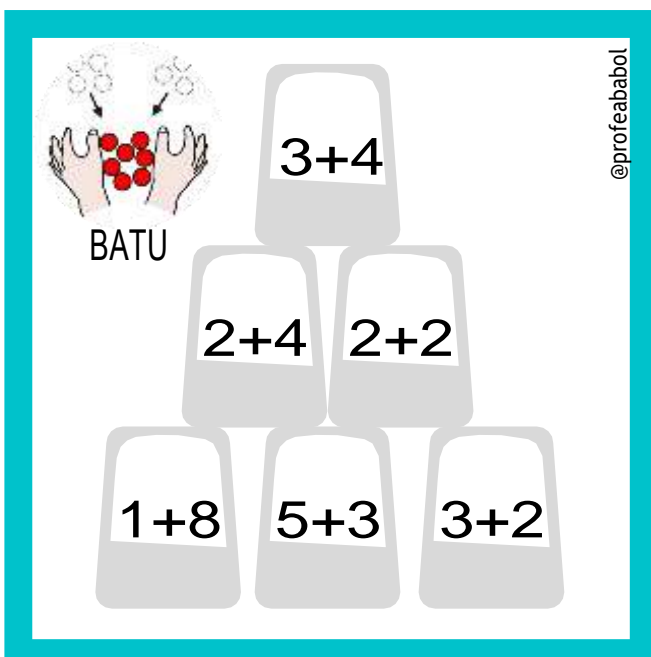

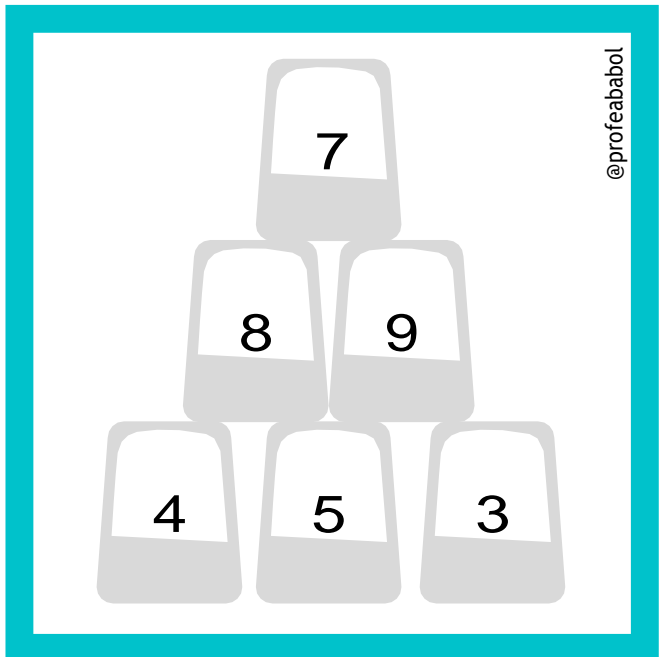

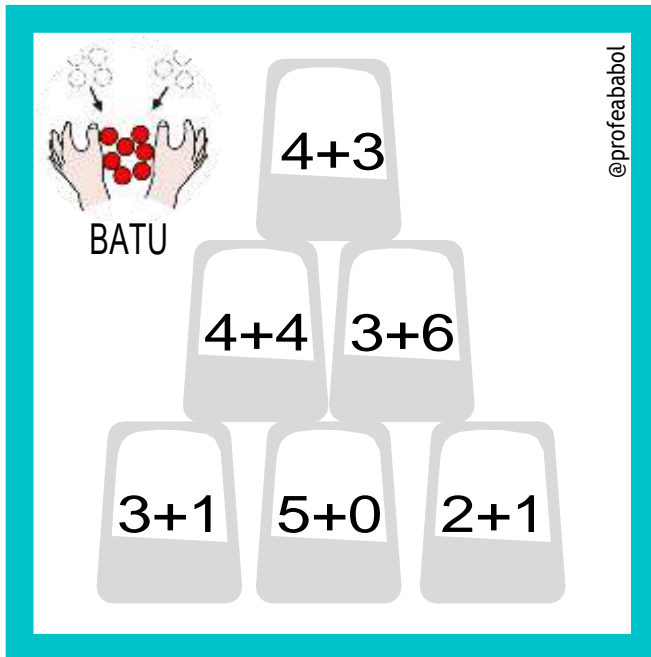

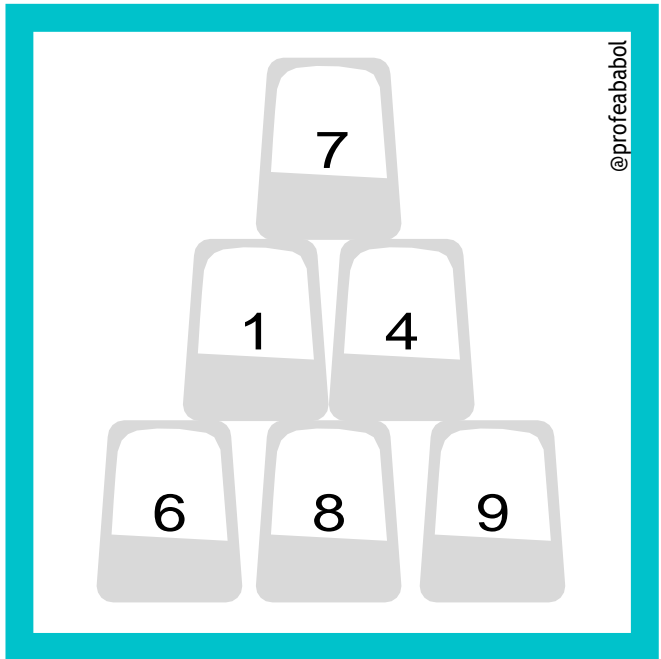

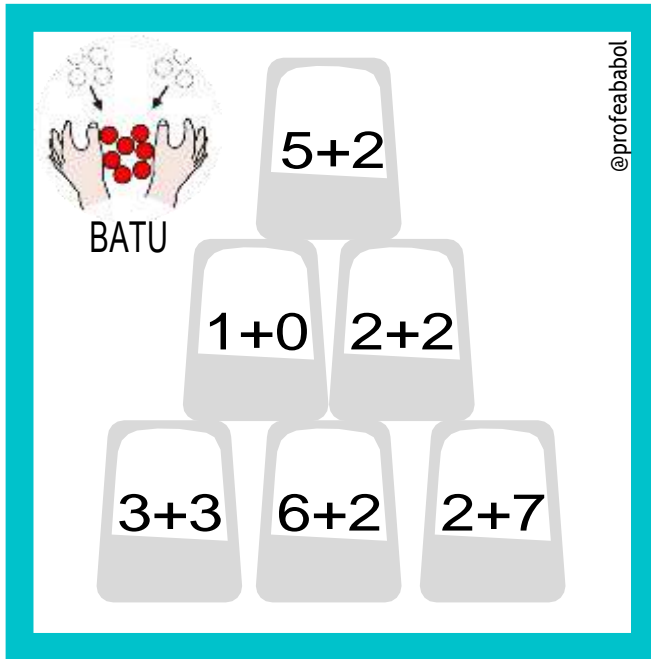

-Bi laguntza-txartel daude: pasteltxoak ezabatzen joateko kenketa-txartela eta batugaien arabera puntutxoak edo gurutzeak marrazteko batuketa-txartela.

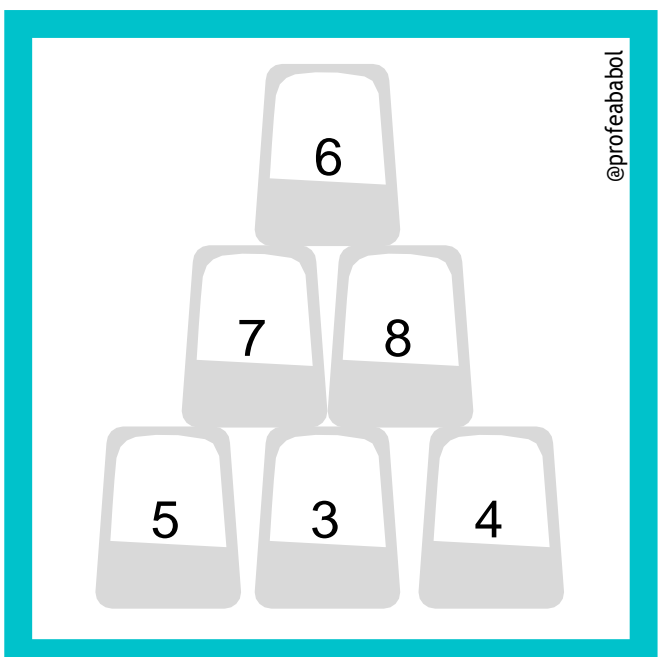

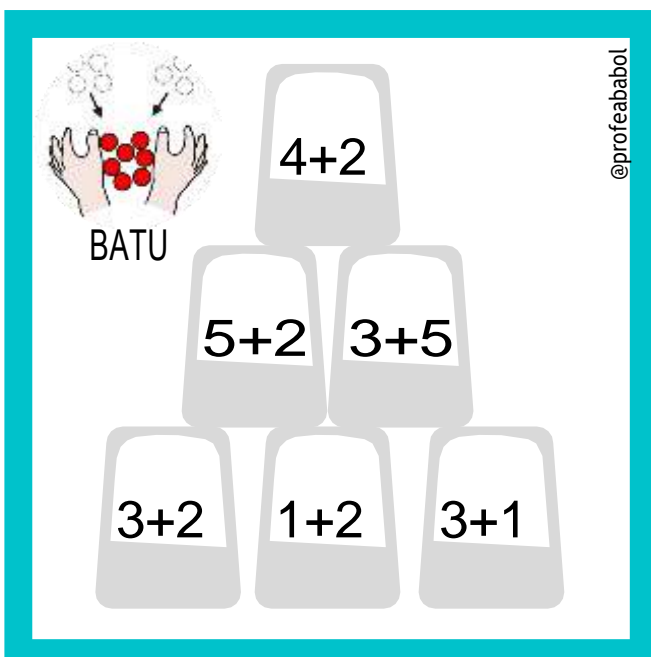

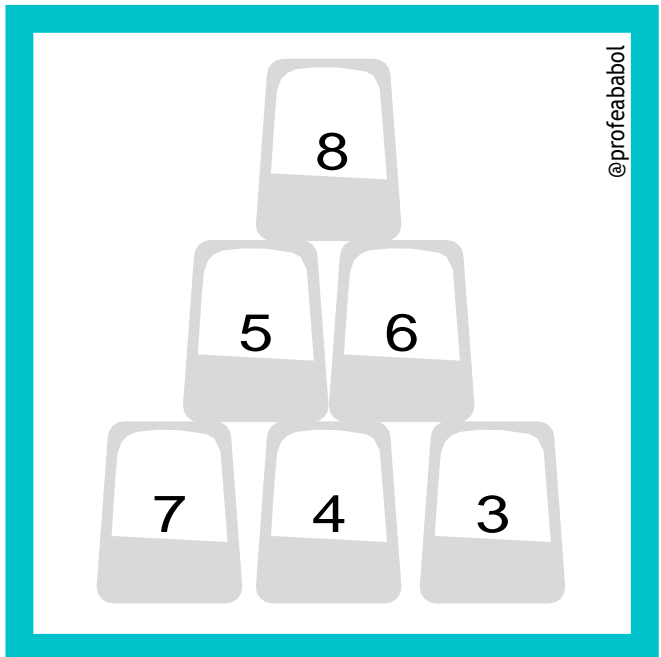

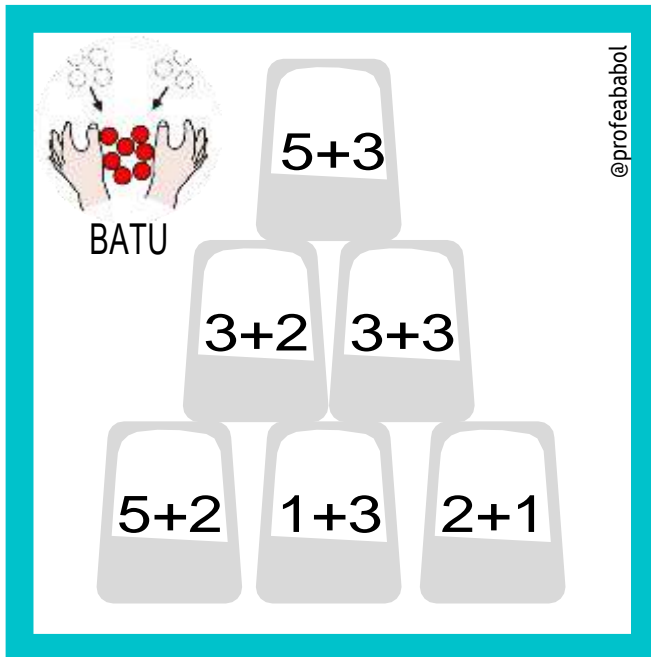

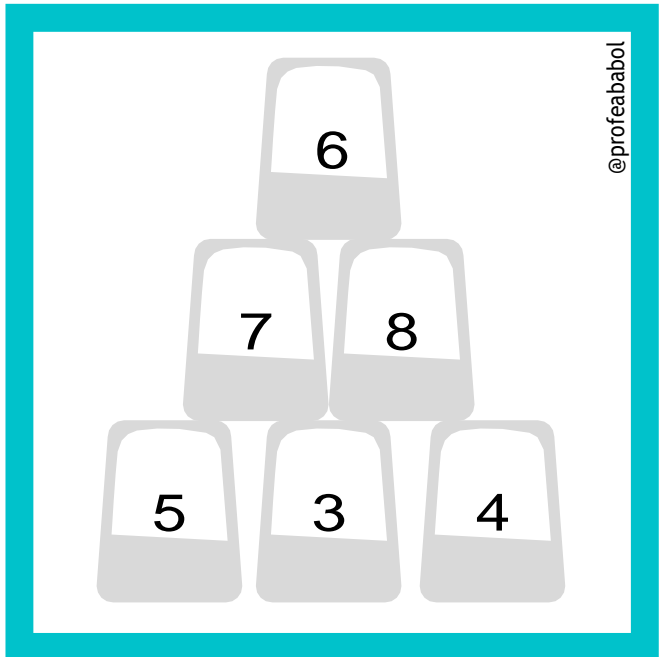

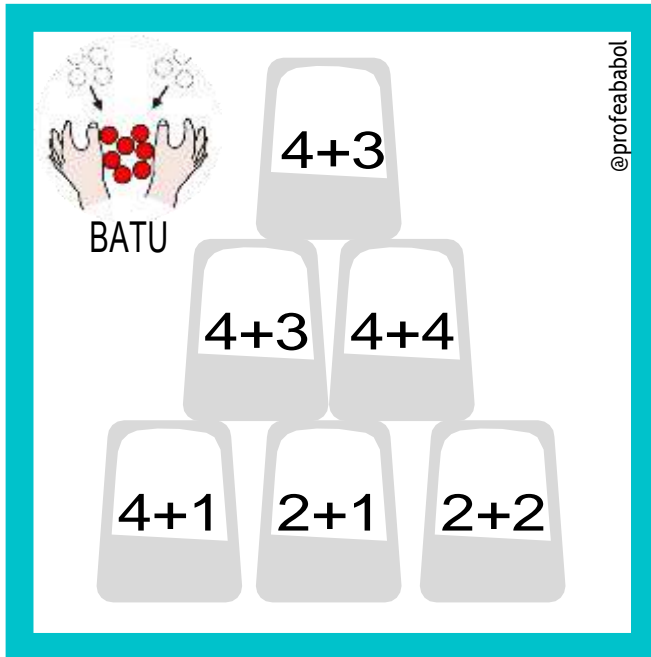

-Txartel autozuzentzgarriak egiteko: eragiketa-txartela eta emaitzadun txartela orri bakoitzean parekatuta daude. Moztu bikoteka eta tolestu erditik plastifikatu aurretik, alde bakoitzean gauza bat gera dadin.

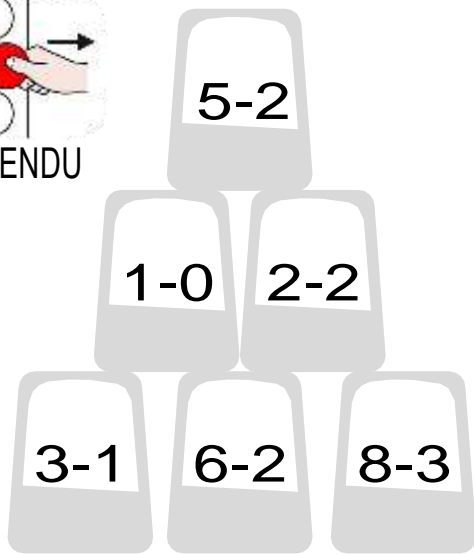

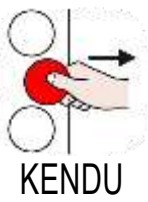

- Ikasleek piramidea egiten dutenean, emaitzak zuzenak badira, pilota batekin edo putz eginez bota dezakete (horrela kutsu ludikoagoa eta motibagarriagoa emango diogu).

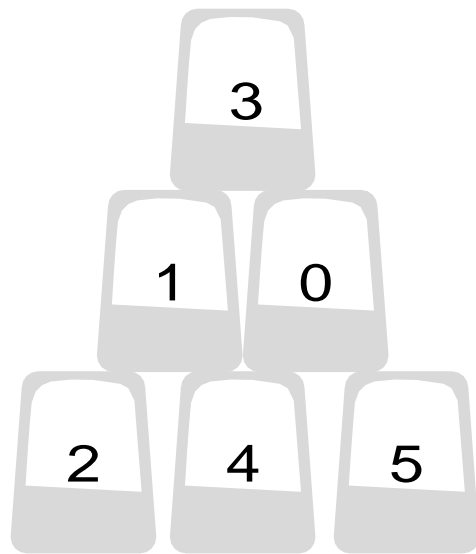

Hemendik tolestu
