Apresentação

Pequeno caderno de atividades matemáticas a realizar em fevereiro com o tema carnaval.

É projetado para uma sala de aula de crianças com autismo, com vários níveis de competências ou com diferentes estilos de aprendizagem e execução de tarefas. Por isso existem duas versões do caderno: Nível 1 e Nível 2.

O nível 1 apresenta inúmeras indicações visuais para que o aluno que necessita de um modelo tenha real autonomia na realização das tarefas propostas. Para algumas páginas, pode precisar de ajudas verbais ou recursos visuais adicionais. As tarefas matemáticas são um pouco mais fáceis do que no nível 2, por exemplo; a série consiste em agrupar as mesmas imagens em linha, enquanto no nível 2 já encontramos imagens intercaladas.

O material é adaptado com pictogramas ARASAAC para servir de suporte visual para a criança. Além disso, os enunciados têm o mínimo de palavras e estão em letras maiúsculas. Por outro lado, usamos elementos grandes e evitamos a sobrecarga visual.

Pode ser um material útil para outros alunos com dificuldades de compreensão ou que estejam a iniciar-se na matemática.
