LÚDICA

# Apresentação

Pequeno caderno de atividades matemáticas para realizar em fevereiro subordinadas ao tema do Carnaval.

Foi concebido para uma sala com alunos com PEA com diferentes níveis de competências ou com diferentes estilos de aprendizagem e execução de tarefas.

É composto por 10 páginas de estilo lúdico:

- 3 para colar autocolantes.
- 3 para contagem.
- 3 de linhas para revisão de grafomotricidade.
- 1 de desenho livre.

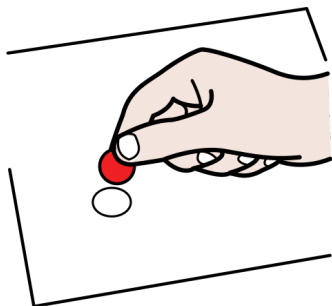

Pode ser um material útil para outros alunos com dificuldades de compreensão ou que estejam a iniciar-se na matemática.

É muito visual e divertido, contando com pictogramas ARASAAC e caligrafia em letras maiúsculas.
