Apresentação

Pequeno caderno de atividades matemáticas para realizar em fevereiro subordinadas ao tema do Carnaval.

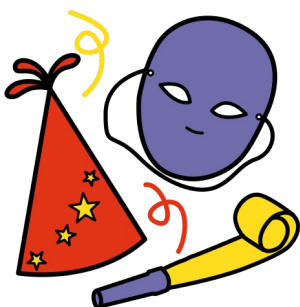

Foi concebido para uma sala com alunos com PEA, com vários níveis de competências ou com diferentes estilos de aprendizagem e execução de tarefas. Por isso existem TRÊS versões do caderno: Nível 1, Nível 2 e versão adaptada.

O nível 1 apresenta inúmeras indicações visuais para que o aluno que necessita de um modelo tenha real autonomia na realização das tarefas propostas. Para algumas páginas, pode precisar de ajudas verbais ou recursos visuais adicionais. As tarefas matemáticas são um pouco mais fáceis do que no nível 2, por exemplo; a série consiste em agrupar as mesmas imagens em linha, enquanto no nível 2 já encontramos imagens intercaladas.

A versão adaptada é a versão mais especial, destinada a crianças que gostam de ordenar e classificar e de atividades estilo TEACCH. As próprias actividades indicam como se faz, sem necessidade de explicação ou de ajuda nossa. Conseguimos assim uma maior autonomia e realização pessoal.

O material é adaptado com pictogramas ARASAAC para servir de suporte visual para a criança. Além disso, os enunciados têm o mínimo de palavras e estão em letras maiúsculas. Por outro lado, usamos elementos grandes e evitamos a sobrecarga visual.

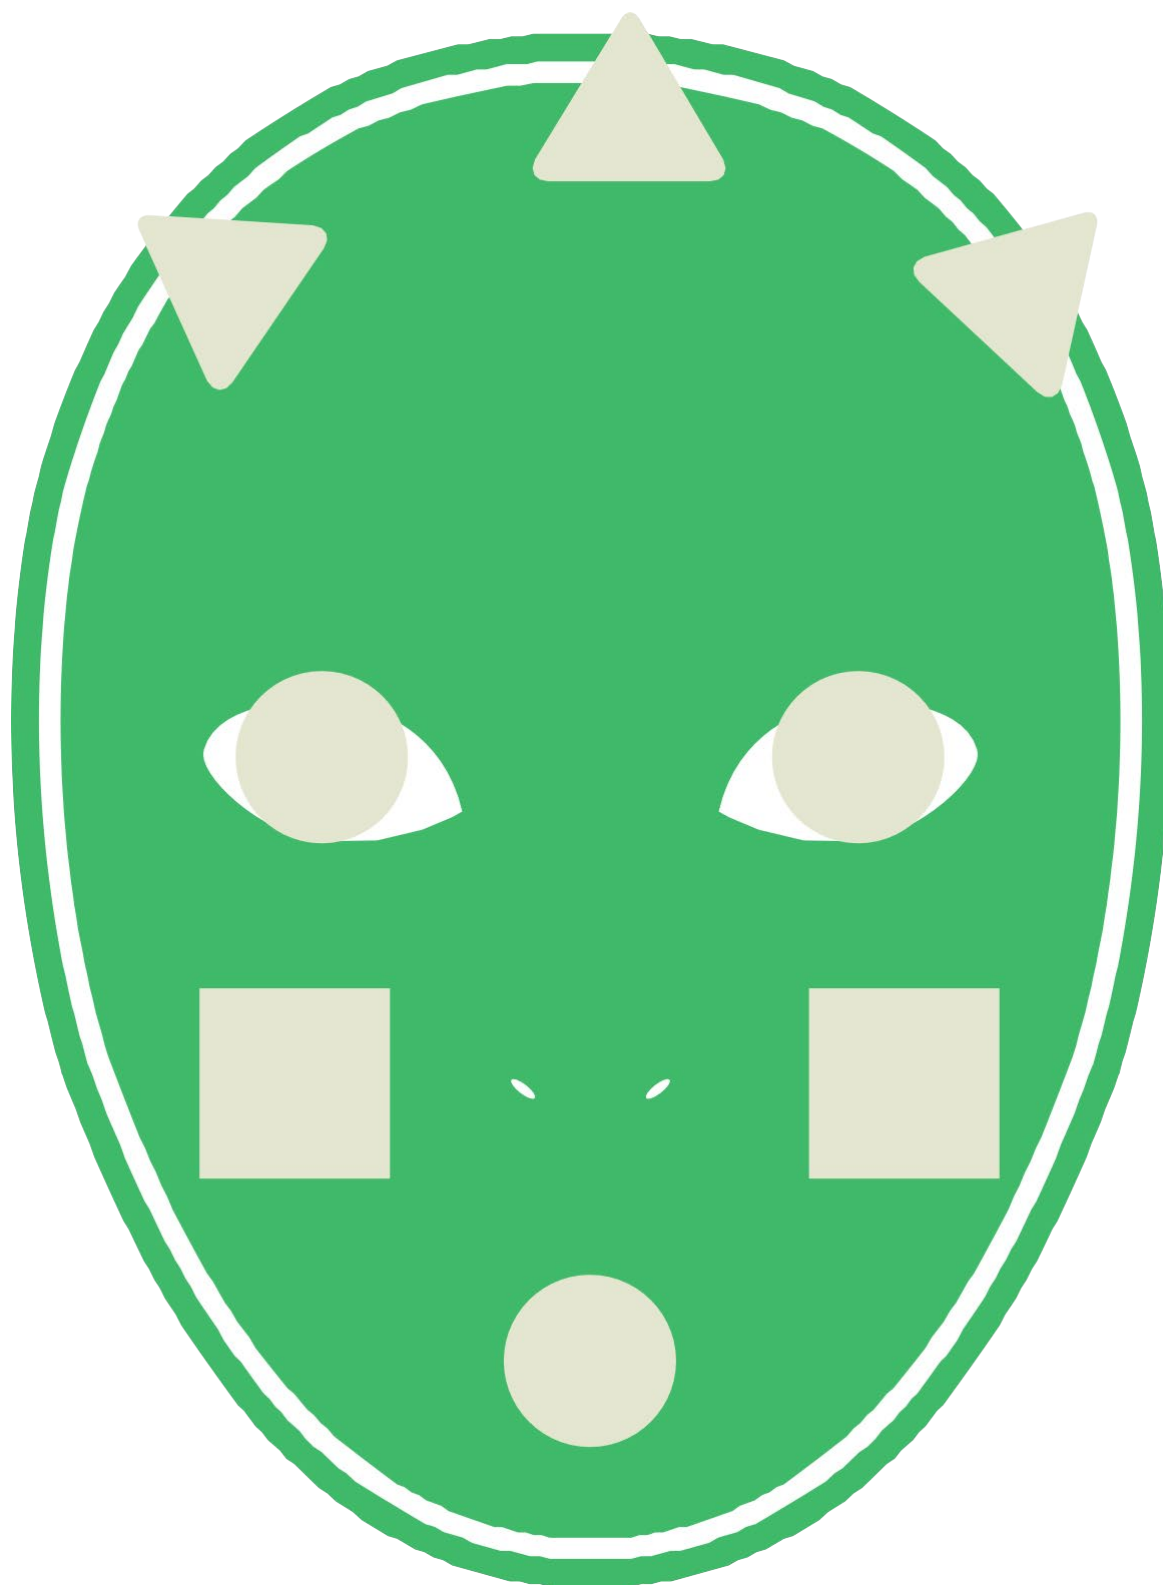

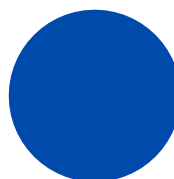

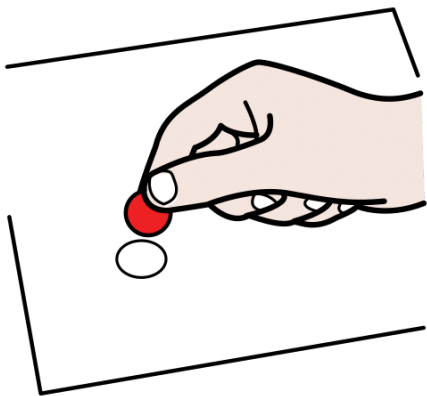

Pode ser um material útil para outros alunos com dificuldades de compreensão ou que estejam a iniciar-se na matemática.
