Nota das autoras:

Algumas crianças, especialmente as diagnosticadas com perturbação do espectro do autismo (PEA), apresentam **dificuldades para aprender e utilizar o jogo simbólico**. Estes guiões visuais têm como objetivo facilitar a aprendizagem de esquemas de jogo de ficção (que podem realizar-se com bonecos ou interpretando um papel como personagens de uma peça). **Antes de usar estes guiões**, devemos verificar se a criança já é capaz de **brincar de forma funcional** com outros brinquedos e se já **começou a simular ações com bonecos e outros objetos**, bem como a **fazer substituições simbólicas** (por exemplo, pegar num bloco de madeira e fingir que é um carro).

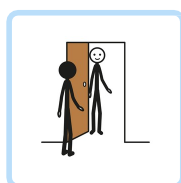

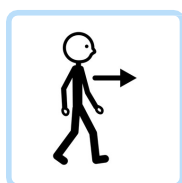

Estes guiões são combinações simbólicas (envolvendo a união de várias ações simbólicas no mesmo jogo), a última etapa no desenvolvimento do jogo simbólico. Se a menina ou menino ainda não realiza espontaneamente este tipo de combinações, este é um recurso muito útil para desenvolvê-las. Além disso também podemos usá-los como **histórias sociais** ou como **imagens separadas para reforçar estágios anteriores** (por exemplo, usar isoladamente a cena da troca da fralda como um exemplo visual do que fazer com o bebé).

Esperamos que ache este recurso útil!
