## 8-2 Realiza las siguientes restas

A visual subtraction problem using columns. On the left, there are 4 yellow columns. In the middle is a black minus sign. On the right, there are 3 yellow columns, followed by a black equals sign, and then a large empty square box for the answer.

$$4 - 3 = \square$$

A visual subtraction problem using columns. On the left, there are 5 yellow columns. In the middle is a black minus sign. On the right, there are 2 yellow columns, followed by a black equals sign, and then a large empty square box for the answer.

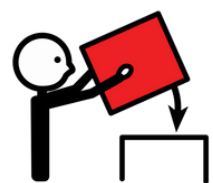

$$5 - 2 = \square$$

A visual subtraction problem using columns. On the left, there are 3 yellow columns. In the middle is a black minus sign. On the right, there are 2 yellow columns, followed by a black equals sign, and then a large empty square box for the answer.

$$3 - 2 = \square$$

A visual subtraction problem using columns. On the left, there are 2 yellow columns. In the middle is a black minus sign. On the right, there is 1 yellow column, followed by a black equals sign, and then a large empty square box for the answer.

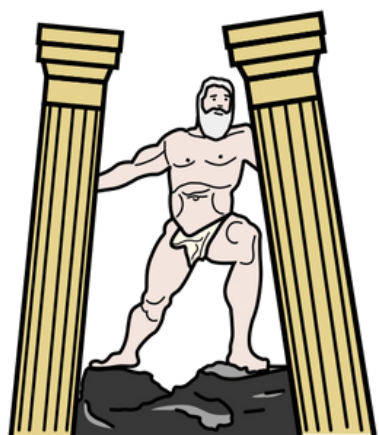

$$2 - 1 = \square$$
