

PRIMAVERA

O que acontece nesta estação?

Depois do inverno chega a primavera.
Começa no dia 20 de setembro.

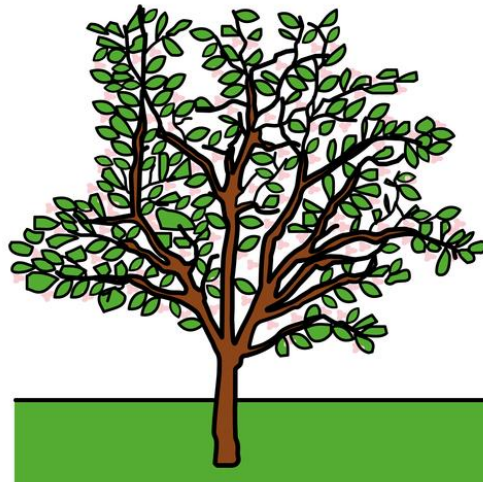

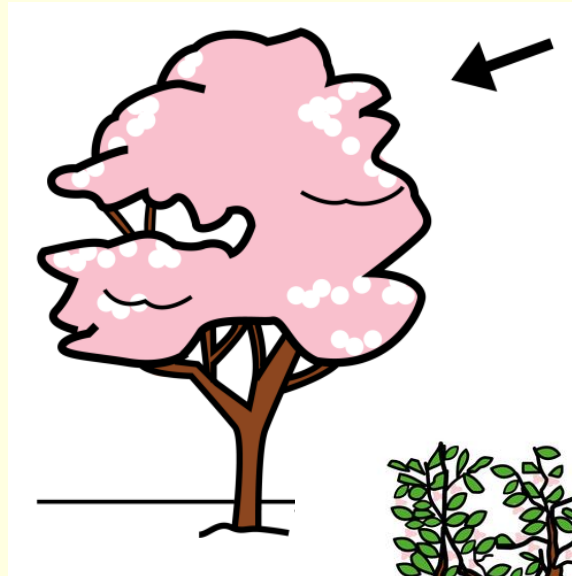

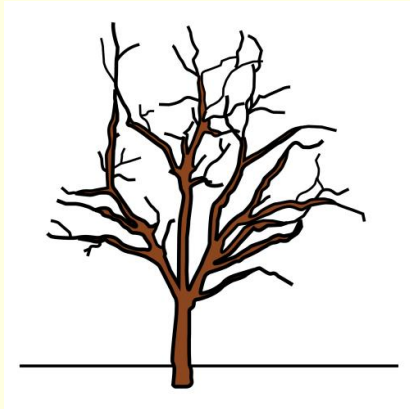

Tem mais horas de sol. Os dias são mais longos e as noites mais curtas. O sol fica mais quente.

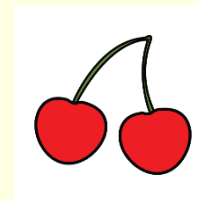

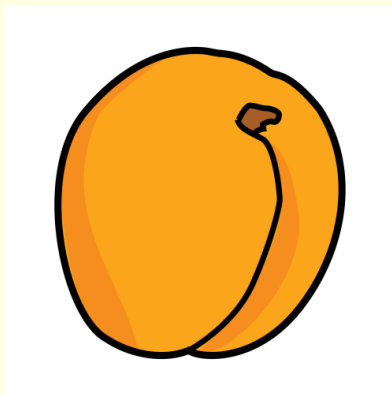

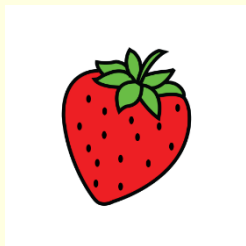

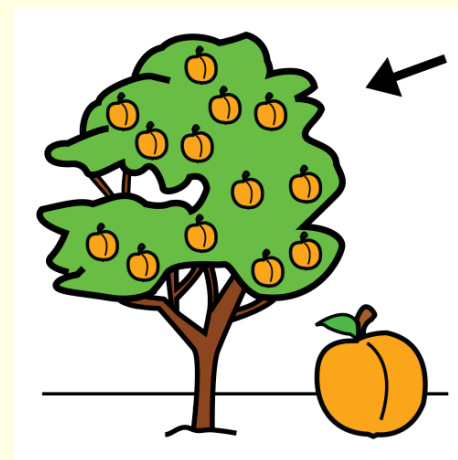

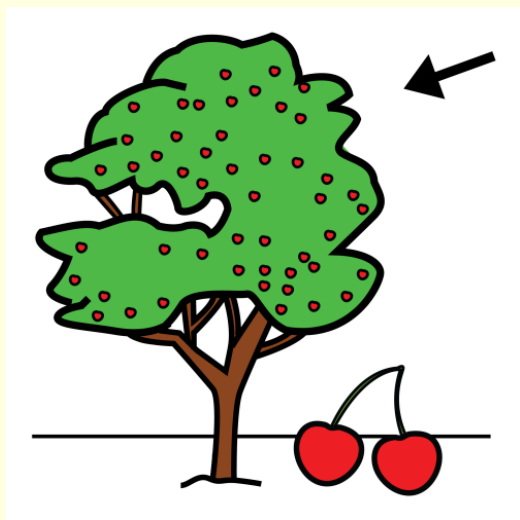

Na Espanha a primavera começa em março.
Lá no último sábado de março a hora é
ajustada: se adianta uma hora nos
relógios. O que eram duas horas passa a
ser três

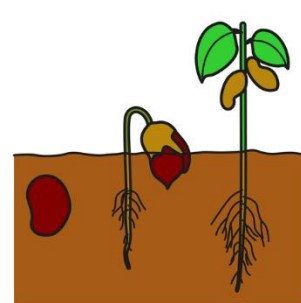

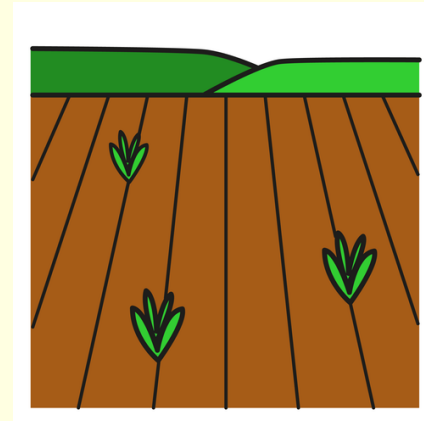

As árvores que estavam sem folhas
começam a florescer e a brotar folhas.

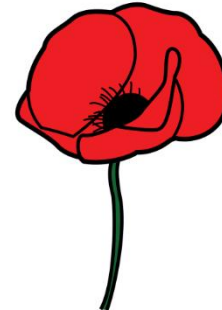

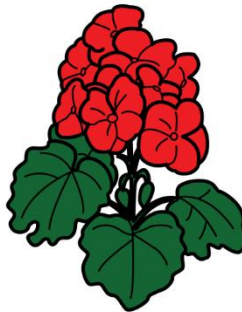

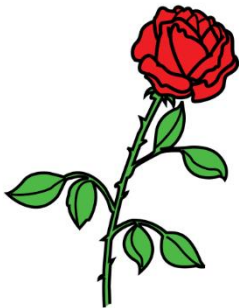

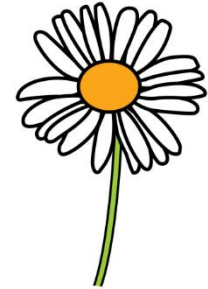

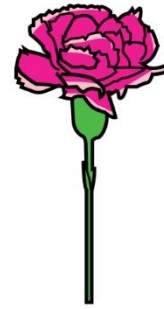

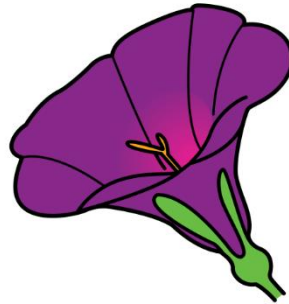

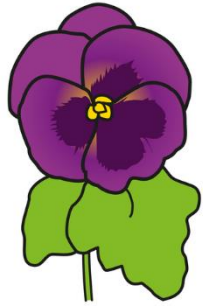

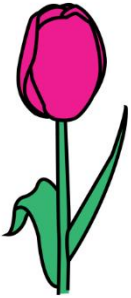

Depois chegam as frutas: é época de cerejas, morango, damascos, pêssegos...

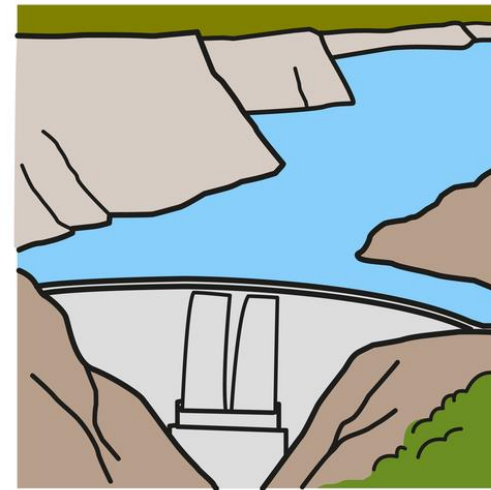

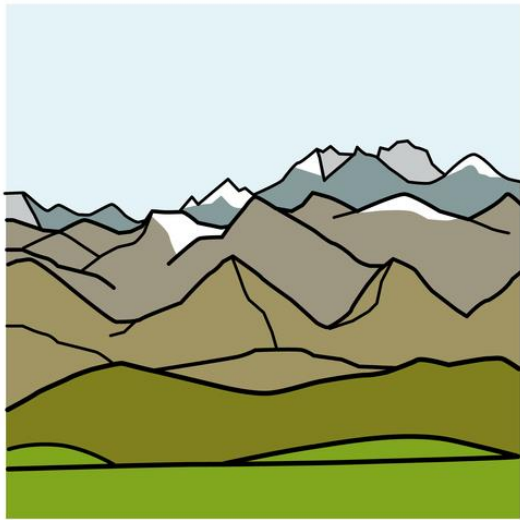

A paisagem fica muito verde, as plantas crescem mais depressa.

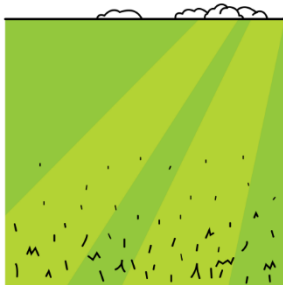

Nos campos e jardins florescem rosas,
margaridas, lírios, cravos, gerânios, copo
de leite, pensamentos...

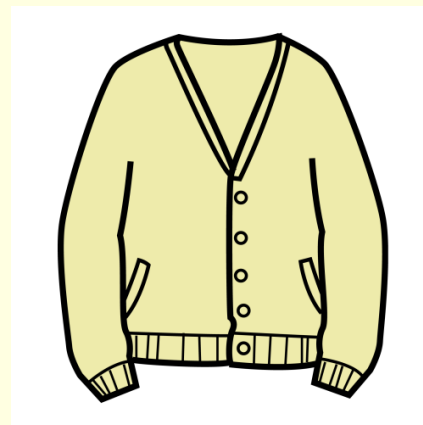

Com o calor, a neve dos países frios se derrete das montanhas e descem pelos rios para encher os reservatórios e pântanos.

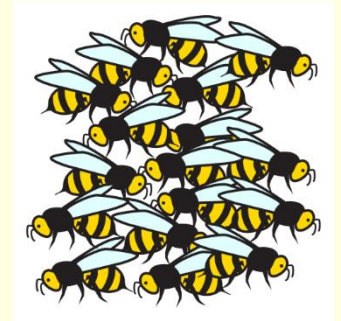

Chove e tudo fica muito verde. Cresce a relva.

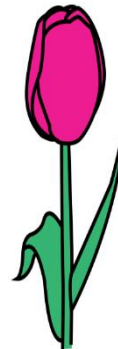

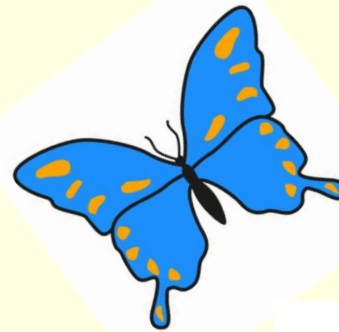

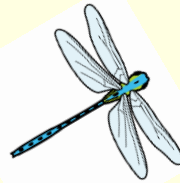

Nós podemos usar roupas mais leves. Vamos guardando os casacos, meias, luvas, ...

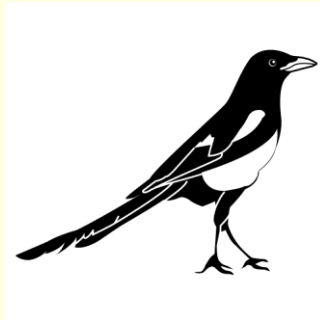

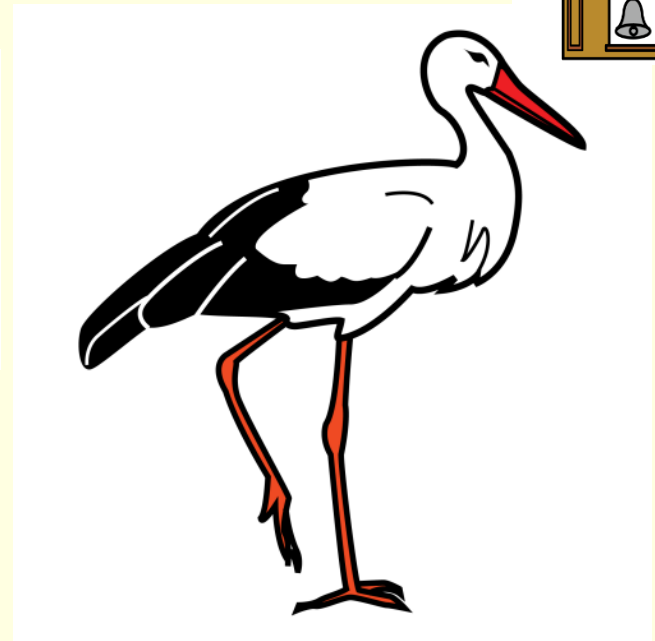

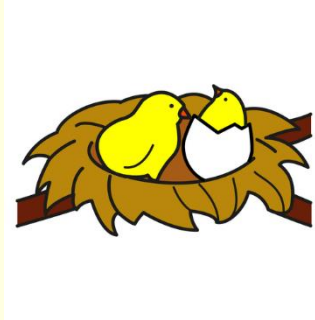

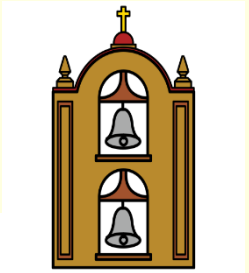

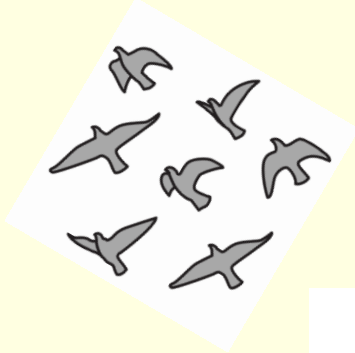

As abelhas, borboletas e outros insetos esvoaçam ao redor das flores.

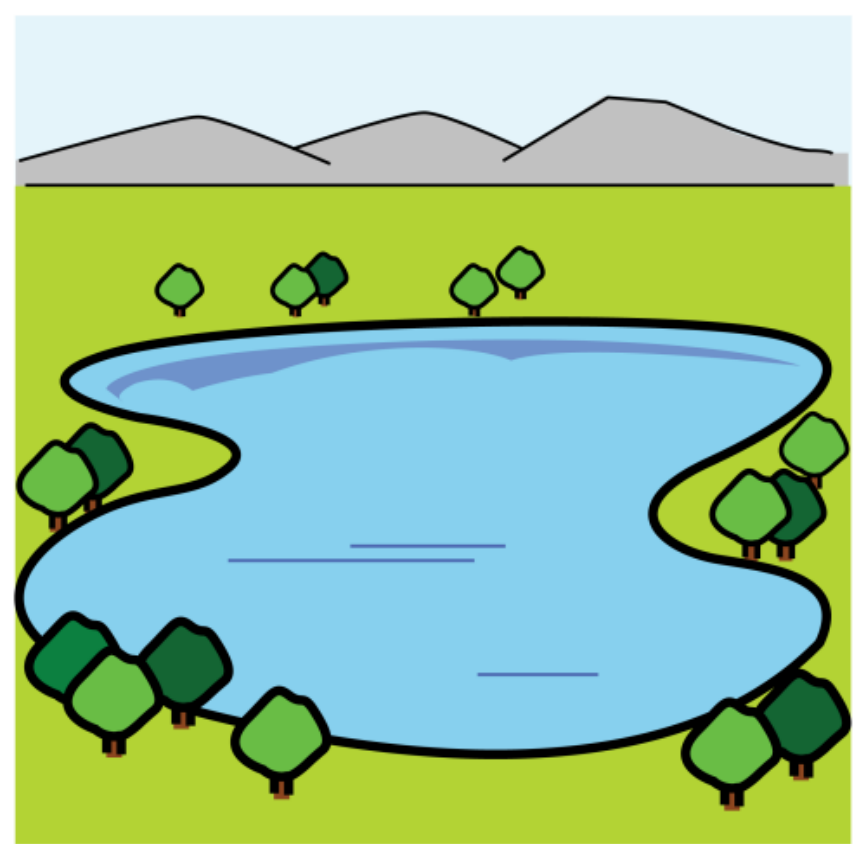

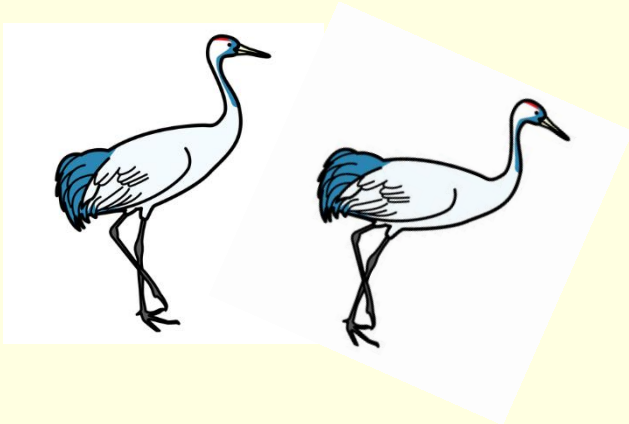

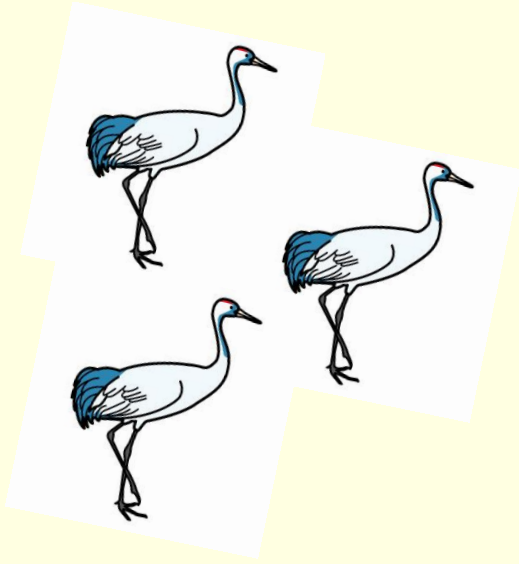

Para chupar o néctar e alimentarse.

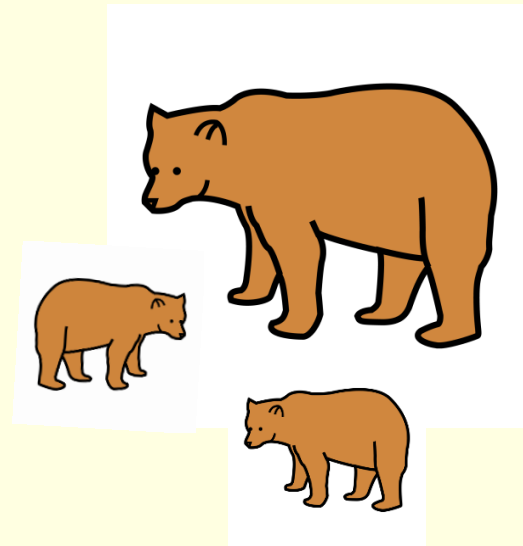

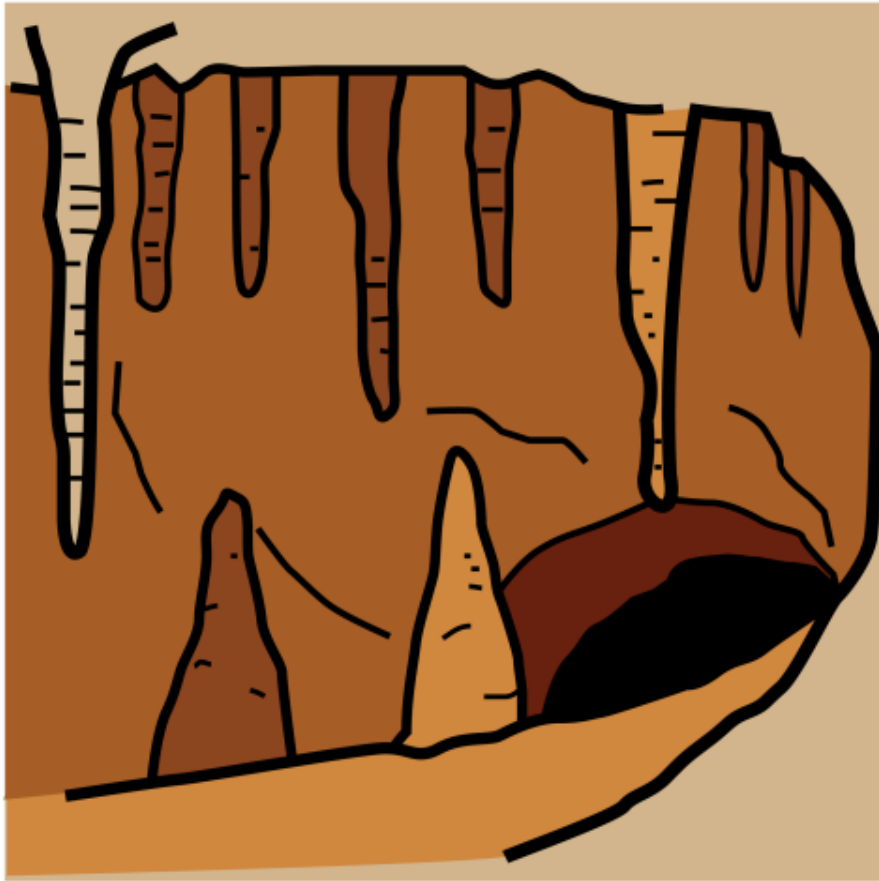

Voltam as aves que emigraram por causa do frio, fazem seus ninhos e põem ovos.

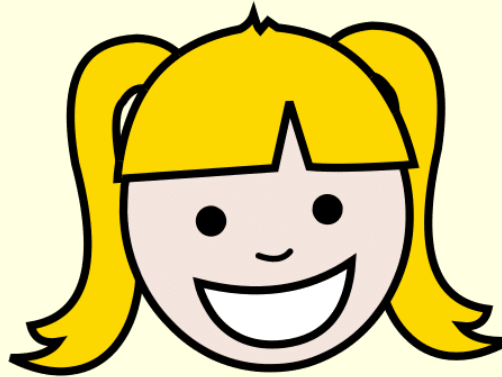

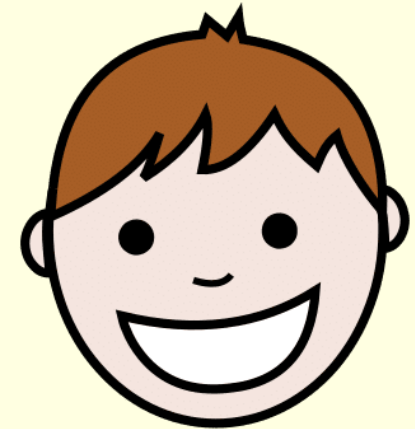

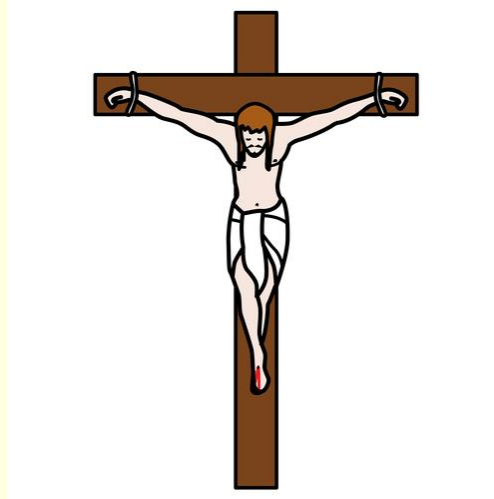

As garças retornam a lagoa de Gallocanta antes de continuar sua viagem para o norte.

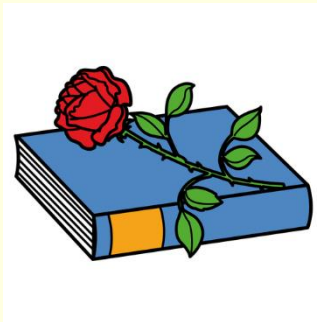

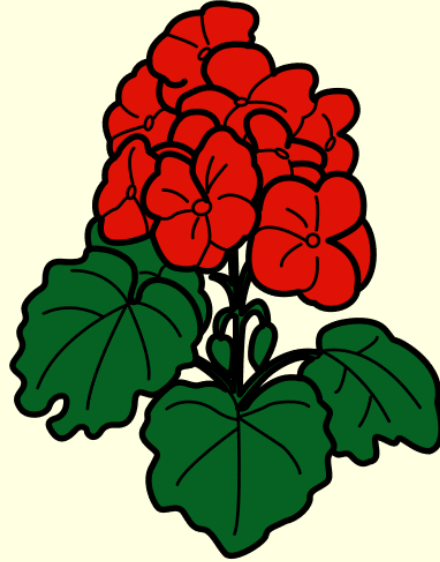

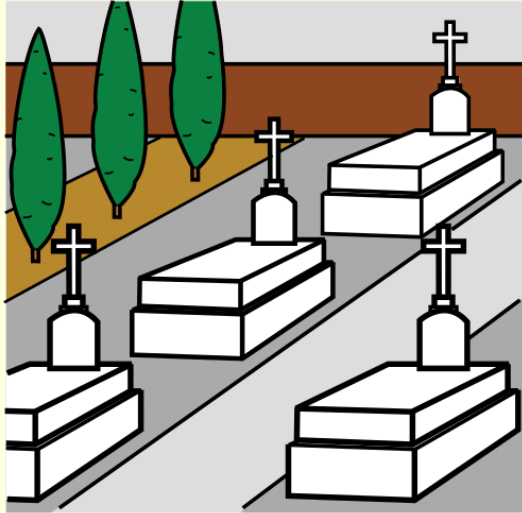

Os animais que hibernaram durante o frio,
saem de suas tocas.

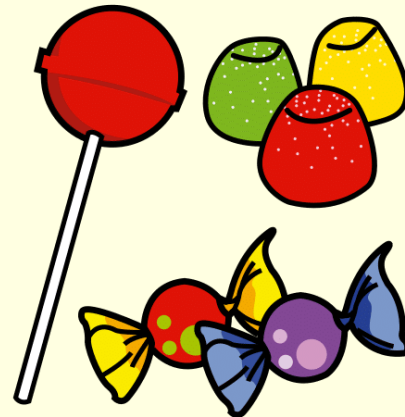

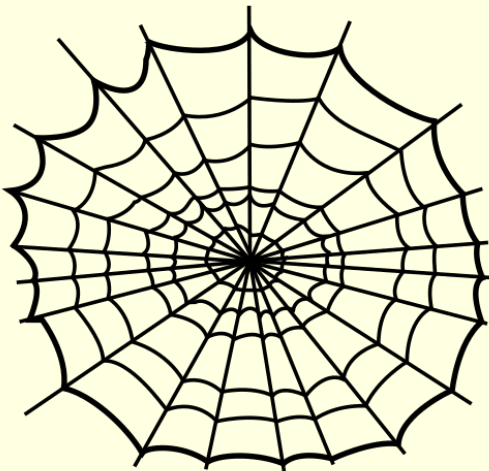

No dia 12 de outubro, comemora-se o dia da criança e da padroeira no Brasil

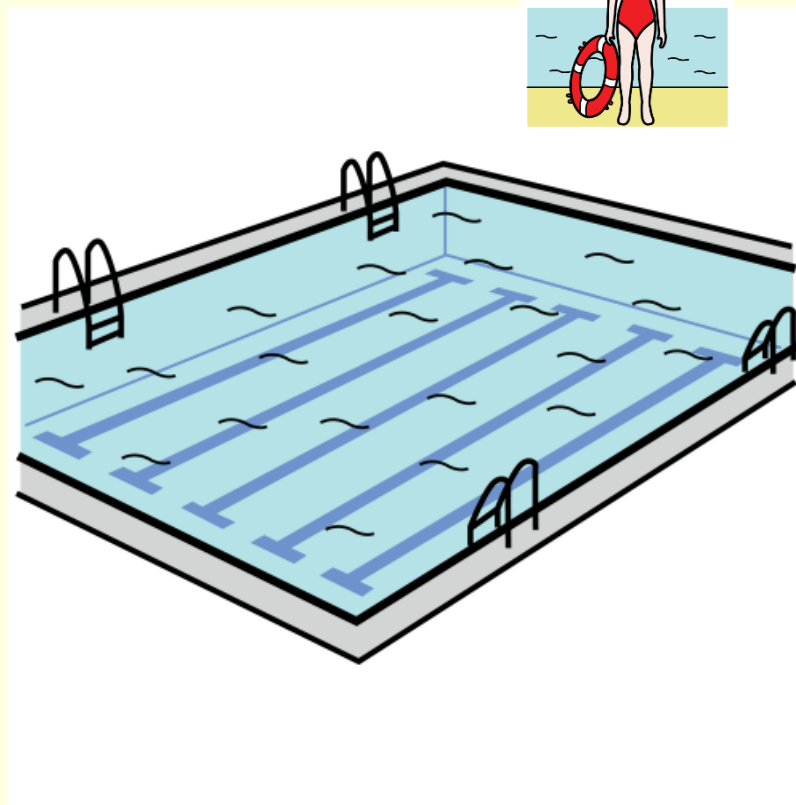

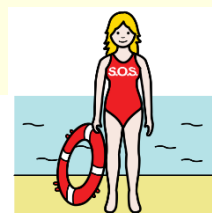

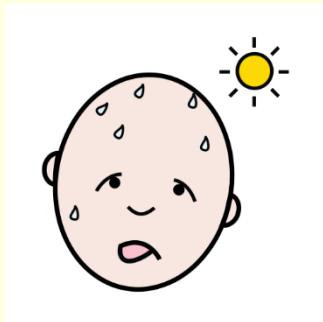

No dia 2 de novembro é o dia de finados.
Os brasileiros lembram-se dos parentes e
pessoas queridas que morreram.

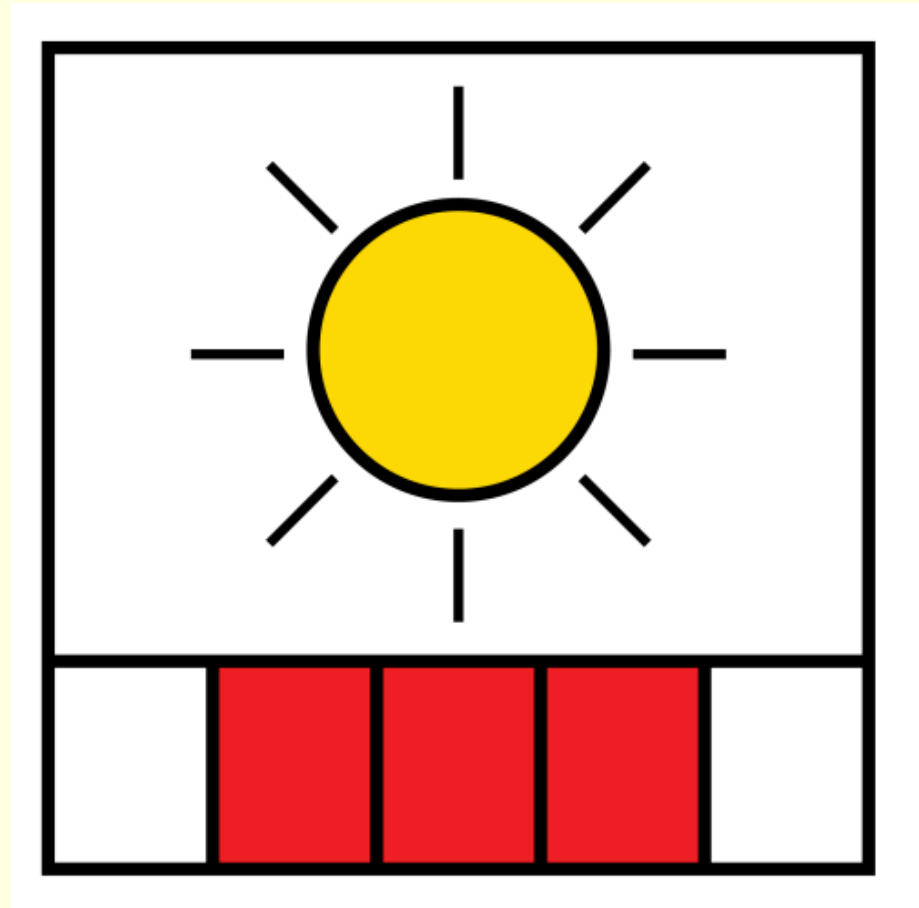

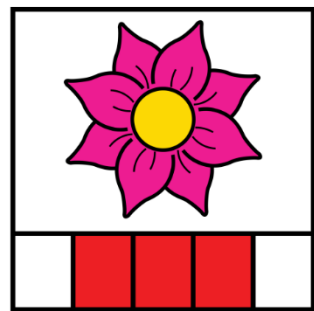

31 de outubro, dia do halloween: Dia das bruxas, evento importado pelo Brasil dos Estados Unidos.

Na primavera podemos usar as piscinas. Faz mais calor.

Em 21 de dezembro acaba a primavera e começa o verão.

E com o verão chegam também as férias.
Mas antes as festas de formatura.
